Subj: Hazardous material; disposal of
Ref: (a) CO, MAG ltr 4:TPW;hb 4000 of 29 Nov 78

1. As requested in reference (a), Base Maintenance Department personnel are investigating disposal procedures of subject material. During discussions with MAG-29 personnel, it was learned that MAG-26 was possibly generating substances similar to those listed in reference (a).
2. It is requested that a survey of all Air Station operations be conducted to determine the type, volume and accumulation rate per month of hazardous materials generated at that activity. Further, it is requested that this information be furnished as soon as possible so an environmentally acceptable solution to the problem can be reached.
3. If additional information is desired, please contact Mr. Julian Wooten or Mr. Horace Foil, Base Maintenance Department, Natural Resources and Environmental Affairs Division, telephone 451-5003/2083.
